**AGGARWAL TOUGHENED
AND
SAFETY GLASS**

WHO WE ARE

Architectural and Decorative Glass experts with the capacity to fulfil over 15000 sqm processing journey from custom glass cutting and toughened glass to glass painting and polishing. We were one of the first few companies to offer shaped bevelled edges.

All ATG glass products – including everything from toughened glass to reflective glass to glass balustrades – are manufactured in-house at our state-of-the-art glass processing plant in Bathinda, Punjab.

Our sister concern, Aggarwal Glass Works has been supplying all types of glasses since 1952 as a trader and wholesaler of glass and related accessories. Moving onto the next level from traders to manufacturers as it is being operated by the 3rd generation, our enterprise Aggarwal Toughened and Safety Glass established in 2015 as one of the major toughened glass processors, located in Bathinda.

We introduced our unit in 2015 and this was the start of the glass processing plant we know and love today. Boasting an innovative automated glass cutting system and a collection of other industry-leading equipment, our glass processing plant enables us to:

- Maintain unrivalled quality
- Meet our customers' exact specifications
- Make lead times again and again.

WHY CHOOSE US

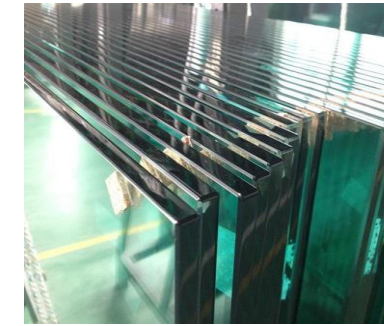

Boasting a team of highly skilled craftsmen with 70 years of experience and personal account managers who provide a full professional service, our state-of-the-art glass processing machinery allows us to achieve a fast turnaround with absolutely no compromise on quality.

A close-knit family business at heart with an ethos grounded in service and quality over quantity, we believe in devoting time and money to our valuable assets so that our customers always receive the very best services and products. Indeed, we nurture our staff as we do our products.

Our portfolio showcases a wide range of services and products to suit a variety of architectural and decorative applications and extensive range of glass thickness available to cater for all tastes, from toughened glass partitioning for the office to frosted glass shower screens for privacy and panache, to kitchen splash backs in any colour imaginable. No matter the size of job, how bespoke it is in nature or whether it is for the trade or domestic market, you can be sure that ATG will deliver.

OUR PRODUCTS

TOUGHENED SAFETY GLASS

Our toughening plant allows us to produce toughened safety glass, 4mm-19mm, to European safety standards in clear, tinted and frosted styles. Our advanced production line can accommodate single pieces of glass as well as bulk order requirements

INSULATED GLASS

We can produce insulated glass in all thicknesses and finishes. Whether you want toughened with a clear, colored or a sandblasted interlayer. As the insulated glass is the most effective way to reduce air to air heat transfer through glazing.

REFLECTIVE / TINTED TOUGHENED GLASS

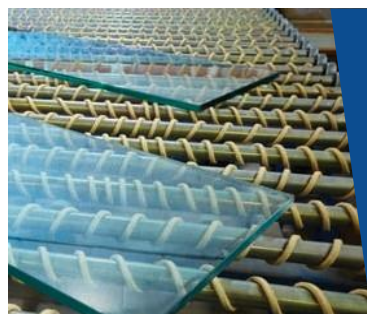

For a wide variety of colors partitioning, shower screens and glass worktops, processed glass in any RAL color with a standard or sparkle finish to coordinate with your interior design scheme. Our advanced production line can accommodate single pieces of glass as well as bulk order requirements

LAMINATED GLASS

We can produce laminated glass in all thicknesses and finishes. Whether you want toughened laminate with a clear, colored or a sandblasted interlayer – or a laminated glass with a decorative fabric or mesh interlayer – the laminating process allows almost anything and everything to be laminated between two pieces of glass.

GLASS PROCESSES

GLASS TOUGHENING

Through our state-of-the-art toughening plant we can supply the following at the highest quality: cut to size toughened and tempered glass, in thicknesses from 4mm to 19mm; clear, coloured or painted glass; printed, frosted or mirrored glass; and laminated toughened glass

GLASS CUTTING

We offer CNC and hand-cutting of glass and mirrors in all thicknesses. This includes bespoke shapes and cut-outs for fittings to your exact specifications and designs. We can work with either DXF files (associated with CAD) or your customer templates, which we can scan and convert into DXF files.

GLASS POLISHING

Our double edge polishing machines produce the neatest and safest edges to mirrors and other glass products in myriad shapes. The range of glass thicknesses we can polish spans 4mm to 19mm and we can create either flat or arris polished edges to suit your needs.

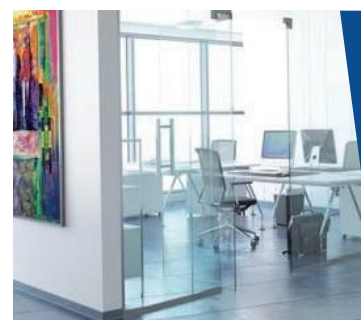

GLASS BEVELLING

With our two top-of-the-range beveling machines, we can produce bevels for straight glass and mirrors as well as for simple shapes such as circles and ovals in widths ranging from 6mm to 40mm. Our skilled craftsmen can also bevel more complex shapes by hand

GLASS SANDBLASTING

With our sandblasting capabilities, we can produce frosted or obscure mirrors or toughened and processed glass to your exact requirements. This includes patterns, lettering and etched glass designs for a wide variety of applications such as: mirrors, signs, shower screens, and table tops.

GLASS PARTITION

With our modern glass toughening and laminating plants, we are able to accommodate sizes up to 4.m x 2.5m. We can produce interior glass partitioning in a variety of sizes, shapes, shades, designs and finishes for domestic or commercial use

SHOWER SCREENS

A frameless shower enclosure is the highest to the bathroom luxury with our advanced CNC we can produce precision cut frameless shower screen and enclosures in 8, 10, or 12mm. you can choose from clear, extra clear to tinted glass. We also offer a sandblasted finish.

GLASS PAINTING

For a wide variety of applications including splash backs, partitioning, shower screens and glass worktops we can apply a durable painted finish to toughened and processed glass in any RAL colour with a standard or sparkle finish to coordinate with your interior design scheme
